

Announcement of Strategic Relationship between Lunar Station and Lunar Resources Registry

Frankfurt, Germany, 30th November 2021

Strategic Relationship between Lunar Station and Lunar Resources Registry

Lunar Station and Lunar Resources Registry have formed a Strategic Relationship to combine analysis of terrain and resources, with a legal framework and registry platform, to enable industrials to develop business models based on sustainable operations on the Moon.

The complimentary services of Lunar Station’s advanced analysis and the Lunar Resources Registry comprehensive platform service, creates a due-diligence process to measure the commercial viability of locations on the Moon, be it mining, energy, communications, or infrastructure.

About Lunar Station

Lunar Station provides client access to the most comprehensive suite of new data refined into new Lunar insights by way of its MoonHacker™ Intelligence Platform. Mining, Energy, Communications, Financial, Pharmaceutical and Logistics organizations will have the easiest, advanced, and scalable access to the best insights about the Moon that has ever existed before. The MoonHacker™ Intelligence Platform provides comprehensive Lunar environmental intelligence by completely characterizing, terrain, power, minerals, communications, and weather for any spot on the Lunar surface for any point in time. Created in 2016 on the campus of MIT, Lunar Station Corporation is based in Cambridge, MA.

About Lunar Resources Registry

The Lunar Resources Registry (LRR) is a transparent registry of Public (e.g. Space Agencies, science) and Commercial activity on the surface of the Moon. LRR has developed a Registry

Platform, as well as the necessary Space Resources Legal Framework, to give the CisLunar and Space Resources industry a platform to plan and co-ordinate future surface operations, by registering resources, energy, and infrastructure locations, on the Moon. A Registration with LRR is not a right, nor an exclusive claim, to a resource, or a specific location.
